

East 11th and Perry Avenue Access / Construction Coordination Request

A significant roadway reconstruction project will occur in the Manette community in 2021. The City will be fully reconstructing the roadway and sidewalks within the right of way in the limits shown below.

We realize this project will have significant impacts to many and we are trying to keep these impacts to a minimum. We are seeking input about the priorities of residents, businesses and interested stakeholders related to access during construction and construction scheduling. With this input, we will develop a construction plan to help minimize impacts while delivering the project. Please let us know your thoughts.

Do you prefer:

- High intensity construction with shorter durations
- Longer construction duration with less intense construction?

Are you a business owner within Manette in the East 11th vicinity?

If so, which address? _____

What is the least desirable time period for a three month construction project to occur near your business? _____

What is the most desirable time for a three month construction project to occur for your business? _____

Can you get deliveries to your business if East 11th is closed between Pitt and Perry Avenue?

Please let us know of any customer or delivery accommodations needed to keep your business open during construction _____

Are you a Local Resident or Impacted Party?

Do you live within the project corridor and if so, which address or block?

What is the least desirable time period for a three month construction project to occur near your home? _____

What is the most desirable time for a three month construction project to occur near your home?

Please let us know of any special accommodations you would like for access during construction and anything you wish the City to consider related to construction.

Please email your input to Christopher.dimmitt@ci.bremerton.wa.us
